Route Volume vs Cycle Time

Knowledge-Flow Recommendations

Recommendations focus on handoff clarity, route pressure, rework loops, and central-team load.

1. Review the route Assessment → Support; it has the highest flow friction score (88.1).

2. Delayed/blocked handoffs are elevated at 19.4%. Add ownership checkpoints for high-volume routes.

3. Create a weekly knowledge-flow review for high-centrality teams and overloaded handoff pairs.
